# HAWKER CENTRES

These cooked food centres are open-air complexes that house a variety of inexpensive food stalls. Typically found in city centres, they sprang up following rapid urbanization in the 1950s and 1960s, in part to help address the problem of unhygienic food preparation by unlicensed street hawkers. In Singapore, hawker centres are losing popularity due to growing affluence, and many are being replaced by indoor, air-conditioned food courts.
